# Keep It Sprung!

Below is the original 74 kit. It is similar to the new Sporty kit includes fender, seat, light, and optional bar. Call for specifics.

Several months back we did an article on a hot on rear section for the Harley "1" entitled: The Rear End Connection. What it amounted to was a complete rear fender, sissy bar, seat combination which was easily bolted to the rear frame mounts of any "1". The unit really gives any swinger a hunk that exists in look without sacrificing the ride. Well, response to that first article was tremendous and so were the number of inquiries from Sportster riders. If it was good for "1"s they felt it could clean up the Sportster class.

Frank, owner of CFF and designer of the Rear End Connection, knows a good thing when he sees it and as soon as he caught up with the "1" riders he designed a rear section that would bolt directly to the popular Sportster. For info write: CFF Dept. 30014 Sheldon, San Mateo, CA 94062.

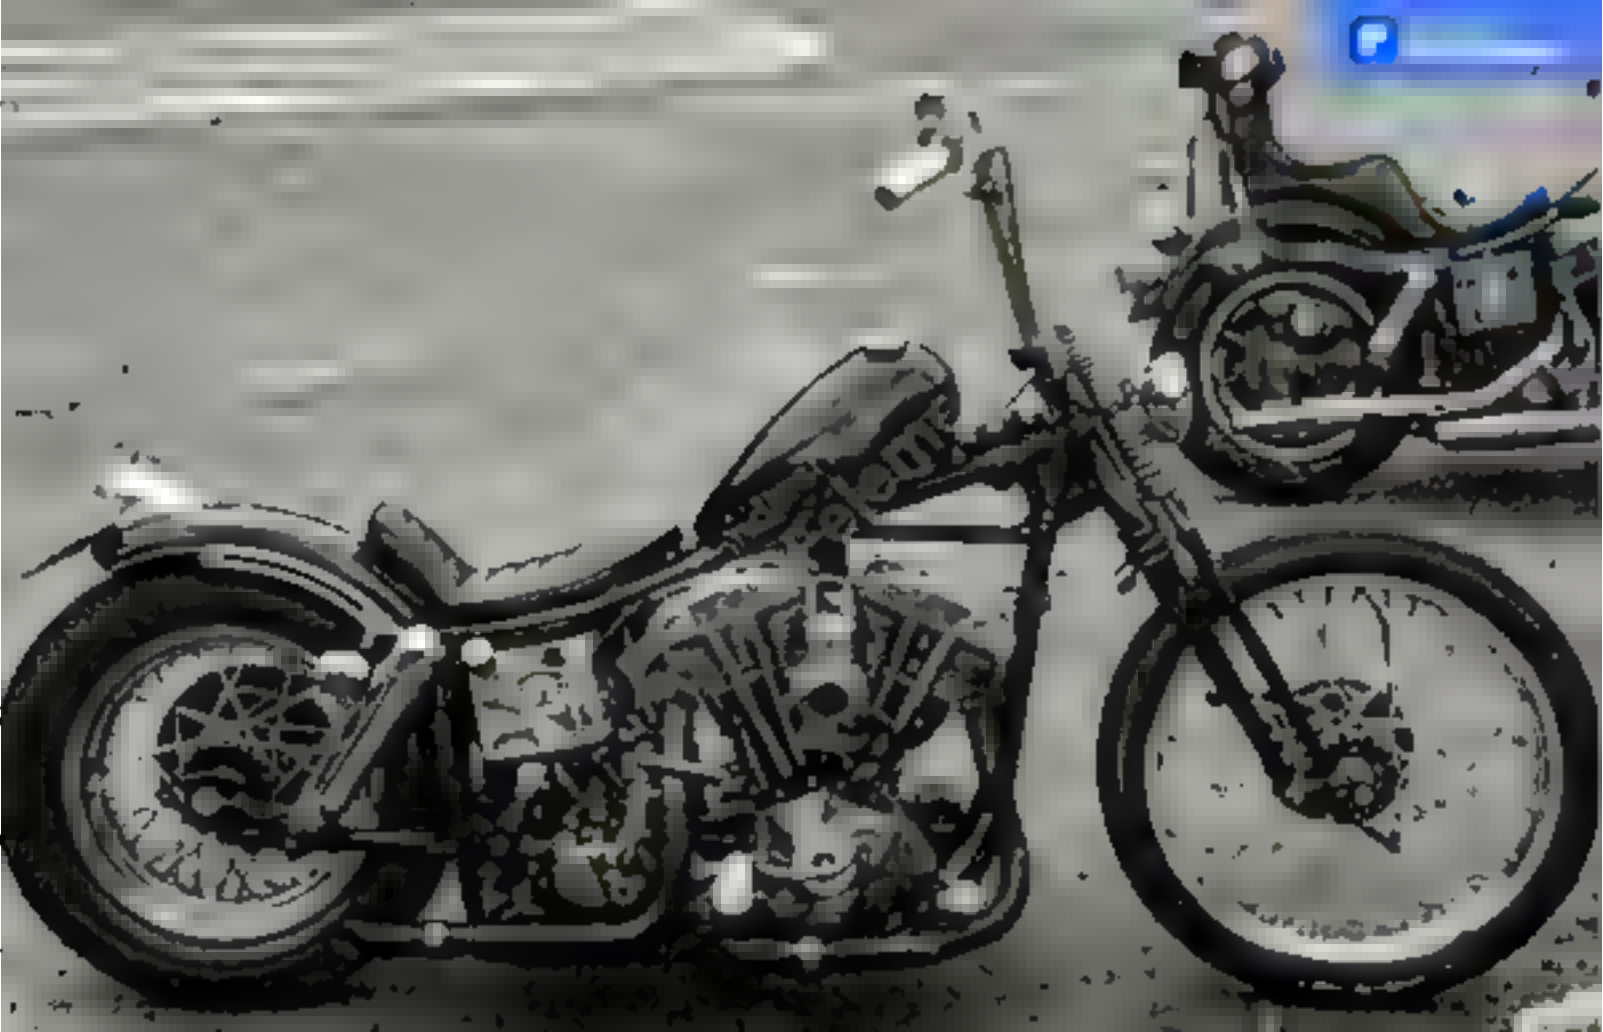

In the shot above you can see only 60% of the design and mounting without sissy bar.

At night a hidden sissy bar design and sissy bar combination. Bar is an easy snap fit. Call CFF at 213-694-9402 for details.
